

Machine Learning and Full Stack Engineer with an M.S. in Cybersecurity and experience developing web applications, analyzing data, and building machine learning solutions. Skilled in Python, SQL, React, and modern AI tools to rapidly design, implement, and deliver practical software solutions. Published researcher with experience spanning cybersecurity, machine learning, and full-stack development.

EDUCATION

Gannon University , Erie, PA, USA	Graduate Date: Dec 2024
• Master of Science in Cybersecurity	Cum.CGPA: 3.68/ 4.0
Daffodils International University , Dhaka, Bangladesh	Graduate Date: Dec 2020
• Bachelor of Science in Computer Science & Engineering	Cum CGPA: 3.60/ 4.0

SKILLS

- **Programming Languages:** Python, JavaScript (ES6+), C, SQL, HTML5, CSS3, Bash
- **Web Development:** React.js, Next.js, Node.js, Express.js, RESTful APIs, Tailwind CSS, Responsive Web Design, Authentication(Firebase), JSON
- **Machine Learning & Data Science:** Scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib, Seaborn, Feature Engineering, Data Preprocessing, Model Evaluation, Classification, Regression, Clustering, Explainable AI (XAI), Deep Learning Fundamentals
- **Data Engineering & Databases:** MongoDB, MySQL, Firebase, Data Cleaning, Exploratory Data Analysis, Data Visualization, Database Design, Query Optimization
- **Cybersecurity:** Web Application Security, Secure Code Review, Vulnerability Assessment, SIEM (Splunk, Elastic Stack), Nessus, OpenVAS, Wireshark, Network Security, IDS/IPS, Incident Response, Threat Intelligence
- **DevOps:** AWS Fundamentals, Git, GitHub, CI/CD Concepts, Docker (Basic)
- **Development Tools:** VS Code, Jupyter Notebook, Google Colab, Postman, Chrome DevTools, GitHub Actions
- **Operating Systems:** Linux/Unix, Windows, Command Line (Bash), PowerShell
- **Professional Skills:** Problem Solving, Software Development Lifecycle (SDLC), Technical Documentation, Cross-functional Collaboration, Research & Technical Writing, Data Analysis, Critical Thinking

WORK EXPERIENCE

UPSKILL CONSULTANCY INC (May 2026 – Present) - Full Stack Developer

- Develop and maintain scalable full-stack web applications using modern front-end and back-end technologies.
- Design responsive and user-friendly interfaces with HTML, CSS, JavaScript, React, and Tailwind CSS.
- Build and integrate RESTful APIs while ensuring secure authentication and efficient data exchange.
- Design and optimize database schemas and queries to improve application performance and scalability.
- Debug, test, and deploy applications while maintaining high code quality through version control and code reviews.
- Collaborate with cross-functional teams to deliver new features and improve application architecture.
- Implement security best practices and performance optimizations across both client-side and server-side applications.

TAAS Services LLC (Nov 2025 – Apr 2026) – Junior Information Security Analyst Intern

- Assisting in monitoring and analyzing security alerts, logs, and incidents.
- Supporting vulnerability assessments and basic penetration testing activities.
- Assisting with audits of information systems to ensure compliance with security policies.
- Supporting the development and documentation of information security policies, procedures, and best practices.
- Assisting in risk assessments and remediation planning for security gaps.
- Collaborating with IT and compliance teams to ensure data integrity, confidentiality, and system availability.
- Preparing reports on findings and recommendations for security improvements.

TAAS Services LLC (Apr 2025 – Nov 2025) – Digital Marketing Analyst

- Collected, cleaned, and analyzed marketing data from Google Analytics, email campaigns, and social media platforms to evaluate campaign performance.
- Created interactive reports and dashboards to communicate marketing insights and key performance indicators.
- Conducted market research and competitor analysis to identify trends and support strategic decision-making.
- Assisted in SEO/SEM optimization by performing keyword research and analyzing website traffic metrics.
- Managed content planning and campaign tracking across multiple digital platforms.
- Collaborated with design and content teams to improve user engagement and campaign effectiveness.
- Utilized data-driven analysis to support marketing decisions and optimize campaign performance.

Technext Limited(Bangladesh) (Apr 2021 – Nov 2021) – Software Engineer Intern

- Assisted in developing web applications using React, HTML, CSS, and JavaScript, contributing to UI components that improved user navigation.
- Collaborated with senior engineers to build and test RESTful APIs in Node.js/Express, supporting new feature development.
- Wrote unit tests with Jest to ensure code reliability.
- Helped optimize MongoDB queries and database schemas, reducing load time for key endpoints.
- Participated in code reviews and implemented feedback, improving code quality and following best practices.
- Supported deployment tasks on AWS S3 and EC2, gaining hands-on experience with cloud-based hosting.
- Debugged and fixed UI/UX issues, improving customer satisfaction scores from QA testing.

PROJECTS & PUBLICATION

- Advancements and applications of generative artificial intelligence and large language models on business management: A comprehensive review
- Transforming breast cancer identification: An in-depth examination of advanced machine learning models applied to histopathological images
- Comparative analysis of machine learning algorithms for predicting cybersecurity attack success: A performance evaluation
- Comparative analysis of machine learning models for accurate retail sales demand forecasting
- Machine Learning Models for Predicting Corticosteroid Therapy Necessity in COVID-19 Patients: A Comparative Study
- Enhancing Viral DNA Sequence Classification using Hybrid Deep Learning Models and Genetic Algorithm Optimization
- Developing a Deep Learning Methodology to Anticipate the Onset of Diabetic Retinopathy at an Early Stage

Certifications and Awards:

- Introduction to Python ([DataCamp](#))
- Intermediate Python ([DataCamp](#))
- Data Manipulation with pandas ([DataCamp](#))
